

M50 Representative Structural Analysis PDF Set

10 analyzed models / refreshed calculation package PDFs

PDF Files

ID	Name	Loads	Combos	MTrace	LTrace	Drift	Max disp.	Max util.	Design	Pages
01-regular-office-frame	Regular office frame	240	28	84	29	OK	5.546 mm	0.381	OK	7
02-l-shaped-neighborhood	L-shaped neighborhood facility	240	28	84	23	OK	3.715 mm	0.363	OK	7
03-u-shaped-school	U-shaped school wing	174	28	57	23	NG	63.66 mm	4.301	Review	7
04-podium-tower-setback	Podium tower setback	436	28	154	41	OK	48.65 mm	3.553	Review	7
05-long-span-warehouse	Long-span warehouse	104	28	37	11	OK	12.77 mm	0.539	OK	7
06-open-parking-frame	Open parking frame	410	28	145	35	OK	13.55 mm	1.045	Review	7
07-apartment-frame-equivalent	Apartment frame equivalent	756	28	270	41	OK	4.173 mm	0.358	OK	7
08-courtyard-hospital	Courtyard hospital frame	672	28	240	29	OK	9.646 mm	0.628	OK	7
09-transfer-podium-frame	Transfer podium frame	448	28	158	41	OK	37.28 mm	2.652	Review	7
10-torsion-irregular-frame	Torsion irregular corner frame	504	28	179	35	OK	6.754 mm	0.495	OK	7

Review Notes

- Each PDF was generated from a fresh elastic analysis run.
- M44 load-standard audit, M45 member design trace, M48 load-derivation trace, and M49 serviceability drift summaries are included.
- The current package is a preliminary engineering trace, not a sealed final design document.
- Drawing/image/MGT import and agentic vision modeling audit trails are planned future inputs.
